# **WEATHER OF CONCERN**

## **Weather of Concern**

### **Northern California**

- Evening breezy winds will bring more smoke to northern Sacramento valley from the Carr and Mendocino complex fires. Less winds with hot and dry conditions will return this week with widespread triple digit highs in the Central Valley by mid week. Smoke from wildfires will continue to impact air quality. Could be a slight cool down and breezy winds next weekend with the potential for another weather system passing through.

### **Southern California**

- Monday and Tuesday will bring very hot weather to most inland locations. An increase in the easterly flow will bring some moisture back to southern California starting Wednesday and bring slight chances of thunderstorms to the mountains and deserts through next weekend.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

### **\*\*\* Monsoon Thunderstorms Possible Late Thursday and Friday \*\*\***

For the next week or so low pressure will be west of the Pacific NW and northern CA and strong high pressure will be centered over the Desert SW. The low pressure area will have more impact on the region for another couple of days.

W-NW winds will increase again this afternoon through the coastal range and over the higher terrain in the east. By late afternoon gusts to 20-30 mph will spread through the gaps and passes of the coastal mountains and into the western Sacramento Valley. Some spots from the Cascade-Sierra crest east will see SW-W gusts reach 25 mph or so this afternoon. Minimum Relative Humidity (RH) values will be 7-17% in the driest interior areas. These conditions will be repeated each day through Thursday while a warming trend takes place. By Wednesday or Thursday temperatures will be 5-8 degrees above normal. There is a chance that monsoon moisture could move northward and produce thunderstorms late Thursday and Friday. This situation will be watched very closely.

## **SOUTHERN CALIFORNIA**

### **\*\*\*Strong westerly winds across the desert passes through this evening\*\*\***

### **\*\*\*Gusty northerly nighttime winds over Santa Barbara County and the Grapevine through Monday\*\*\***

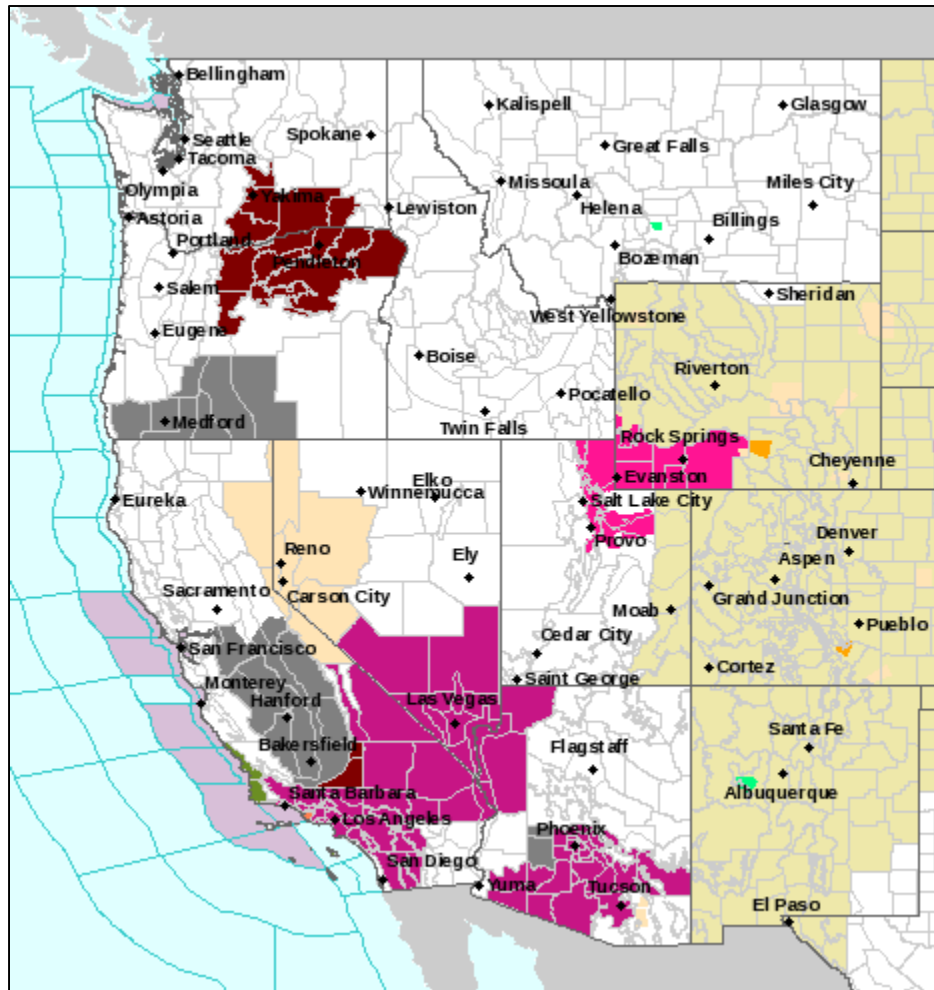

### **\*\*\*Very dry through Tuesday\*\*\***

### **\*\*\*Hot Monday through the end of this week\*\*\***

There will be little change in the weather as our region remains in between a weak Pacific trough over Northern California and a strong high pressure area over the Desert Southwest. West winds of 20 to 30 mph with gusts to 50 mph will surface across the desert passes through this evening. North nighttime winds of 15 to 25 mph with gusts to 40 mph will surface across much of Santa Barbara County and the Grapevine through Monday. Temperatures will be near to a little above normal, with upper 70s and 80s across the mountains and 90s to 102 in the valleys. Minimum humidity will be mainly in the single digits and teens away from the coastal areas. The strong high pressure area over the Desert Southwest will expand westward into Southern California bringing a significant increase in temperature Monday. Maximum temperatures will be in the mid 80s to mid 90s across the mountains and upper 90s to 110 in the valleys. Tuesday looks to be the hottest day across Southern California and Wednesday will be the hottest day across Central California during the next week. It will cool a little late this week as the high moves into Nevada, but widespread triple digit heat is expected to continue across interior lower elevations. Minimum humidity will remain in the single digits and teens away from the coastal areas through Tuesday. Humidity will increase across Southern California starting Wednesday and over the Sierra starting Thursday. There will be no change in the very dry conditions across Central California west of the Sierra through the end of this week. Isolated to scattered afternoon showers and wet thunderstorms will form over the mountains and higher deserts of Southern California east of I-15 Wednesday through Saturday and over the Sierra Crest and Northern Deserts Thursday through Saturday.
